

DANIIL VOLOSUYUK

Senior Frontend Engineer

My experience at the web development is 4 years. I have large experience in web application development, including creating the architecture of the client and server sides, configuring builds, pipelines and deploying apps to cloud services.

Besides that, I think soft skills are just as important as hard skills. Therefore, I am open to feedback and always try to be a good team member. Also can call myself a fast-growing, responsible and multi-tasking person.

WORK EXPERIENCE

Feb 2021 -
current

Frontend Engineer

COHERENT SOLUTIONS - MINSK, WARSAW

Worked on 2 projects as an Angular developer. Participated in reducing bundle size, improving app performance, refactoring huge and complicated forms, configuring build and deploy pipelines, configuring Angular library.

Have used such technologies as: Angular.js, Angular 9-14, TypeScript, NgRx, RxJS, Angular Material, Atlassian products, Git, TFS, Azure and so on.

Oct 2020 -
Feb 2021

Frontend Developer

PRIVATE CLIENT FROM CANADA

Developed a front-end part of the control panel of the company to be used by employees (add/edit products, contacts, events; statistics, dashboards, etc.) and helped a little bit with back-end part.

jQuery, HTML, CSS, JS, Front (Bootstrap 4 based template), Java, Spring.

2019 - 2022

Freelance

Periodically I helped people who I know or people from freelance platforms to fix their issues or build apps for money.

I have used different technologies, including SQL/NoSQL databases, Node.js, Java, JavaScript, Angular, React, Vue, jQuery and many others related frameworks and libraries.

Personal Projects

Besides the work I got paid for, I have a lot of fun and useful personal projects, some of them have become really successful. I got a lot of knowledge and experience from it, highly recommend to visit my personal page (<https://danyavol.dev>) and check the most remarkable projects.
